

Corporate Chiropractic Scheme Welton Bibby & Baron Testimonial

Maristow Chiropractic Clinic offer fully qualified, friendly and efficient chiropractic care to relieve joint and muscle pain, there is also the facilities to carry out diagnostic musculoskeletal ultrasound scans.

Because Maristow Chiropractic Clinic can help with the diagnosis, treatment and prevention of muscle, joint, tendon, ligament and nerve problems, Welton Bibby & Baron approached them to provide their services to employees under a corporate chiropractic scheme. Here Ange Langan tells you more about it.

Introduction

Welton Bibby & Baron is the largest manufacturer of paper bags, carrier bags and printed paper on the roll in the UK. We manufacture billions of impressions every year ensuring our customers receive the best possible economies of scale.

The company began trading as packaging manufacturers in 1858, but we have been operating from Westbury, Wiltshire since 2013.

One of our values is to treat our colleagues, customers and suppliers with respect, keeping our people safe; and as a part of this we instigated a programme to offer our employees access to a chiropractor in 2003.

When we arrived in Westbury we approached Kay Pearce of Maristow Chiropractic Clinic to provide this service for Westbury based personnel – 50 office and 250 production staff who work in shift rotations.

At the moment 39 of our staff are receiving treatment under the scheme.

How does it work?

If an employee has concerns about an ache or pain that is restricting movement or making their job difficult to carry out, or have injured themselves in some way, they make themselves

known to me and I arrange an appointment with the clinic. The staff member attends the clinic as soon as possible for diagnosis, and if it is a condition treatable with chiropractic care a programme of treatments is agreed and Welton Bibby & Baron pay the clinic at the end of each month for the number of appointments attended by staff, which is currently approximately 10 per month.

Why did you choose Maristow Chiropractic Clinic?

We chose Kay's practice for both the convenience of location and their very helpful, friendly manner. Nothing is too much trouble and we even have an emergency contact number for when problems arise out of clinic hours.

Why did you instigate such a programme?

We value our employees and endeavour to protect them through a series of health and safety programmes, this is just one of many. But, we do find that by offering such a service we reduce the number of staff absent through illness, and shorten the length of absence, to such an extent that it proves to be extremely cost effective as well as improving the staff's general well being.

Would you recommend this programme to other businesses?

Absolutely, without hesitation, through our investment in our staff we have seen a decline in sickness absenteeism from back, neck and joint problems.

We respect and look after our staff and in return they continue to help our business deliver the best outcomes to our customers.

Our success will continue whilst ever we nurture the "can do" attitude that is already so prevalent at Welton Bibby & Baron.
